Unified Communications in the Cloud

## MOBILITY

Freedom to communicate from anywhere and using any device.  
Extensive control from mobile application.

## CONVERGENCE

Transparency of communication through various means such as voice, video, chat and email.

Efficiency in  
productivity  
and costs

## COLLABORATION

Optimal productivity through video / audio conferencing, collaborative shared files.  
A single system in the cloud for all your branches or sites.

## RELIABILITY

Fault-tolerant system such as Internet crash and other common problems. Automatic emergency diversions to alternative devices.  
Efficiency in productivity and costs

The calls arrive at the same time to the desk phone and to the mobile device to take it where it is more convenient.

If you do not answer the system you can try to locate it in other numbers.

You can make calls through the corporate switch using the app of your mobile phone.

This and more can be controlled and programmed from an application on your smartphone or on the web.

## Communicate through

- Desktop phone
- Tablet
- Computer or laptop
- Smartphone

## Using any means such as

- Voice calls
- Video call
- Chat
- Email

Strengthen teamwork with tools that facilitate communication.

- Perform Videoconferences
- Share files for the entire team to collaborate.
- Use voice conferencing rooms with easy access from any phone.
- Quickly contact people from the company by dialing from the corporate directory.

- The system has integrated high availability.
- If the Internet service or your local network is interrupted, the system sends the calls to the cell phones automatically.
- In case of disasters like floods or fires it is possible to move the services to another place in a very short time.
- The services reside in the most advanced cloud that meets all industry standards when it comes to quality and safety.

Reduce your total cost of communications (TCO)

Avoid costly investments in fixed assets in advance.

It is paid as a monthly deductible service.

Support and administration are included.

There is no obsolescence or need to budget renovations.

There are no expenses for decompositions and spare parts.

The system is put in operation in a very short term.

The system is elastic because it can grow or decrease as your needs determine it.
